

COMPACTION WHEELS

COMPACTION WHEELS

Custom built for maximum compaction

Our compaction wheels are made to suit all sized machines and feature solid wheel construction with a completely lubricated and sealed bearing system, providing longevity and assisting with ease of use.

They have a custom cast 500-grade compaction cap, custom designed for ultimate compaction with less drag back, and fully sealed, maintenance-free bearings to improve lifespan. The heavy-duty cradle design includes 450-grade mud scrapers.

ShawX Compaction Wheels are:

- ✓ 100% Australian made.
- ✓ Low maintenance.
- ✓ Strong and durable.
- ✓ Quality designed and tested.
- ✓ Available in standard or custom sizes.

FEATURES

- ✓ Heavy-duty frame.
- ✓ Bolt in pins and full through bosses.
- ✓ Fully sealed maintenance free, heavy duty bearing system.
- ✓ Bisalloy mud scrapers.
- ✓ Custom design feet.
- ✓ Three standard sizes to suit the most common trenches: 450mm, 600mm and 900mm.
- ✓ Regularly custom build to suit non-standard size requirements.
